

Ivana Inić, a mathematician. She can't do without books, music, chocolates and new destinations. She is open to innovations. She embraces diversity. She obtained her master's degree from the Faculty of Science and Mathematics, studying and implementing new teaching methods into her practice. She is a co-author of the Erasmus + K1 project "Let's Flip Our Classroom". She helps her students of "Kosta Trifkovic" Primary School in Novi Sad to use the mathematical language to describe the world around themselves. She motivates them to develop critical and analytical thinking, supporting them to create their life formulas based on love and tolerance. As a member of the project team "Living Books in Schools", she will contribute to the foundation of a special library that will broaden horizons and enrich the hearts of young readers with its unusual books. She enjoys the creativity of her son and the attention of her husband.
